

Human Adaptation

Eight centuries of exposure to Duskara's environment have awakened latent psychic abilities in its people:

- **Thermal sensing:** Reading temperature gradients and heat signatures
- **Weather working:** Limited influence over local wind patterns
- **Deep bonding:** Psychic connection to native life forms

Technology balances preserved Earth knowledge with necessity-born innovation. Wind turbines and thermal exchangers power civilization. Ancient satellites orbit overhead, their purposes half-forgotten. Water reclamation is sacred. Every settlement is a fortress against the wind.
